20 April 1965

MEMORANDUM FOR: Director, Budget, Program Analysis
and Manpower

ATTENTION : C/PAS

25X1

SUBJECT : Interagency Committees

REFERENCES : (a) BPAM/PAS Memo, dtd 6 Apr 65,
same subject
(b) BPAM/PAS Memo, dtd 9 Apr 65,
same subject

I DD/S&T does not chair any non-USIB interagency committee.

II. We have reviewed the interagency committees with which DD/S&T is recorded to be associated (attachment B, ref a) to determine the extent of such participation and to consider if further membership on these committees is warranted and desirable. Some exceptions and additions to the listing of "other" interagency committees have been noted and, accordingly, were made part of the committee management record of DD/S&T.

There are no recommendations for the abolishment of committees or changes in terms of reference. However, among the comments on committee listings brought to our attention which may serve the purpose of your report to BOB are the following:

a. The Interagency Conference of Weather Modification: As the title indicates, this group is not strictly a committee. The Office of Scientific Intelligence (OSI) personnel attend as observers at meetings held annually.

b. Telemetry Engineering Committee: This is an ad hoc committee which last met in March 1964 and had only infrequent meetings before that. OEL will continue to participate in this Committee if it is revitalized.

SUBJECT: Interagency Committees

c. Joint Procurement Committee: The Office of Special Activities (OSA) has been advised by NPIC that this Committee is being abolished and in its place the Joint Development Conference is being established.

d. The NPIC Technical Development Committee: This is an in-house committee of NPIC and should not be included on the interagency committee list.
